Note reimbursement for the child care benefit will be made only for child care expenses (as defined in the Income Tax Act) **incurred** by the Member. If, for example, an employee initially paid licensed child care centre fees for the months of January to June (6 months) and was subsequently refunded the fees paid for April to June (3 months) due to an emergency order where licensed child care centres were closed, the employee only incurred expenses for the period January to March. In this example, the employee would enter fees incurred for the months January to March as eligible for reimbursement
